

VIVEK NANDA K – Cybersecurity Portfolio

Email: viveknandak2005@gmail.com

LinkedIn: linkedin.com/in/vivek-nanda-k

GitHub: github.com/viveknandakaruppasamy

Skills

- SIEM (Splunk)
- Linux
- Networking
- TryHackMe Completions

Internships

Security Analyst Intern – Oasis Infobyte (1 Month)

- Performed basic security tasks including Nmap scanning & reporting.
- Created security demonstration videos and documentation.

Android Hacking & SOC Intern – NullClass (Current)

- Working on real-world Android application penetration testing.
- Assisting SOC workflows including log monitoring & analysis.

Projects

Nmap Network Scanning & Enumeration

- Executed basic and advanced Nmap scans.
- OS detection, service enumeration, and vulnerability scans.
- Created video + PDF documentation uploaded to GitHub.

UFW Firewall Configuration

- Configured UFW rules for SSH, http/https and port blocking.
- Validated rule behavior using Nmap scans.
- Documented steps and security outcomes on GitHub.

OSINT Investigation Report

- Used Sherlock, Holehe, theHarvester, and Google dorking.
- Created a full OSINT intelligence report with screenshots.
- Published as PDF in GitHub.

Splunk Log Analysis (TryHackMe)

- Analyzed authentication logs & brute-force attempts.
- Used SPL queries for event correlation & filtering.
- Reviewed dashboards and alert triggers for SOC workflows.
